Disaster Preparedness | Search and Rescue | First Responders | First Aid Kits

medihelpindia.in

The world's first automatic IO device brings you rapid IO access for the delivery of fluids and medications at flow rates higher than IV infusion. With the help of Bone Injection Gun, IO infusion can be established within seconds with an easy "position and press" mechanism.

SALIENT FEATURES

- Safe – no direct contact with patient's blood.
- Quick – intravascular access established in <1 min .
- Easy – short learning curve for caregivers.
- Instrument by caregivers as well as patients
- Minimum pain
- Minimal risks of complications
- Plastic, disposable, automatic spring-loaded infusion device
- FDA (adult & pediatric) and CE approvals
- Completely mechanical, no need for any energy source.

USES

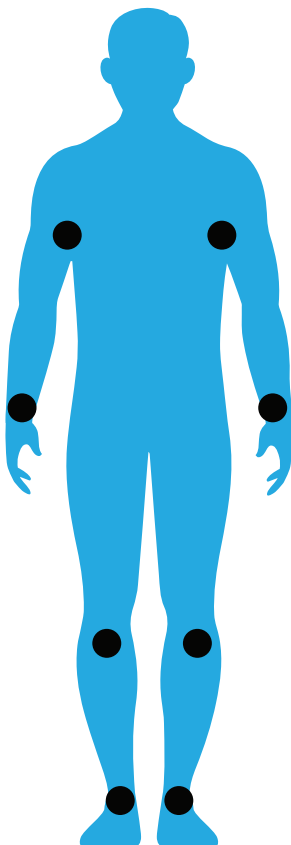

Allowing Safe and Rapid IO Access in Emergency, where Vein lines cannot be established in a Timely Manner

Worlds First Spring Loaded Automatic Intraosseous Devices

Usable in Extreme Conditions

When I.V. access is either difficult or impossible, use the B.I.G for simple and effective Intra Osseous infusion on adult and pediatric patients

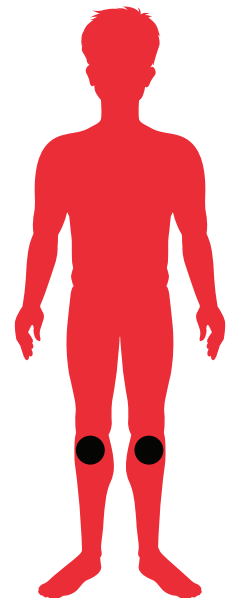

ADULT BIG 15G

Adjust penetration depth according to the insertion site

- Proximal Tibia: 2.5cm
- Proximal Humerus: 2.5cm
- Distal Tibia: 2cm
- Distal Radius: 1.5cm
